

Biopharmac, EU funded project, aims to increase the R&D&I levels in the Macaronesia through cooperation within the region and directed to boost our knowledge in biotechnology and pharma industry, by exploring its large biodiversity. This would assist to its industrial development by transferring R&D results to companies.

One of the key ideas of *Biopharmac* is the formation and training of researchers, thus the Foundation ICIC (Instituto Canario de Investigación del Cáncer), together with the other partners of the project, are organizing the 1st Atlantic Biotechnology Conference centred on the topic Natural Products and Drugs. This is aimed at University and graduate students and postdocs in biology, pharmacy, chemistry, medicine, veterinary, chemical engineering.

Registration to this event is free for the participants. Please be aware that as seats are limited, we operate in a first-come-first-served basis. Registration is open from 3rd August with a deadline on 20th September 2011.

Registration includes attendance to all lectures, handing in printed material, and all lunches. For attending the organised two dinners, those interested should pay to the organisers at the moment of registration (prices still to be established).

The Conference will be held in Tenerife, from 27th to 30th of September 2011 at Hotel Las Águilas, Puerto de la Cruz, North of the Island.

For Registration, please complete and send the form to, and for further information also contact njvazdekis@icic.es (Ph.D. Nabil el Jaber) or visit www.icic.es and www.biopharmac.eu, and check attached files.
