Introduction

With an innovating design, and with the aim of facilitating scientific discussion and conversations among experts, this meeting raised in 2021 because of a post-pandemic scenario in which technology allowed a quick and easy access to a rapidly evolving knowledge in urologic malignancies, but, at the same time, propitiated lesser interaction and discussion around the open questions in genitourinary cancers.

The previous Trending Topics in GU Oncology Meeting was held at La Laguna, Tenerife in April 2024, and was executed over the course of 1.5 days, under the scientific coordination of Dr. Guillermo de Velasco, of the Madrid University Hospital 12 de Octubre, and Dr. Alfonso Gómez de Liaño, of the Las Palmas University Hospital Complex Insular-Materno Infantil. During this meeting, the current issues and future perspectives in renal, prostate and bladder cancer were debated with comprising top experts in urologic oncology, through an unconventional and novel approach in order to limit classic slides presentations, encouraging active participation and debate with expert-based conversations. This year, we have stablished an alliance with Uromigos®, the well-known educational platform led by Tom Powles and Brian Rini, and will bring podcast + videocast sessions with them along with well-recognized international panel of experts in GU cancers.

Scientific Coordinators

Dr. Guillermo de Velasco. Hospital 12 de Octubre, Madrid

Dr. Alfonso Gómez de Liaño. Complejo Hospitalario Universitario Insular-Materno Infantil, Las Palmas de Gran Canaria.

Friday 28th March 2025

15.00 - 16.30 Welcome and introduction
16.30 - 17.00 The unexpected topic in GU cancer
17.00 - 18.30 Trending Topics in Renal Cancer
18.30 - 19.00 Coffee break
19.00 - 19.45 The interactive corner
19.45 - 20.00 "My Top" Session
21.30 Dinner

Saturday 29th March 2025

09.00 - 09.30 Spectacular cases in prostate cancer
